

## Background

Bombora-ESP is an Australian owned and operated independent company that has been created to supply specialist engineering services to owners/operators, consultancies and construction/installation contractors who operate in the offshore oil and gas or renewables sectors.

Run by professional engineers working within the industry, Bombora-ESP specialises in the engineering, construction management and project management of pipeline and subsea facilities.

Bombora-ESP has a reputation for responsiveness, flexibility and providing value.

## What We Do

### As integrated team members:

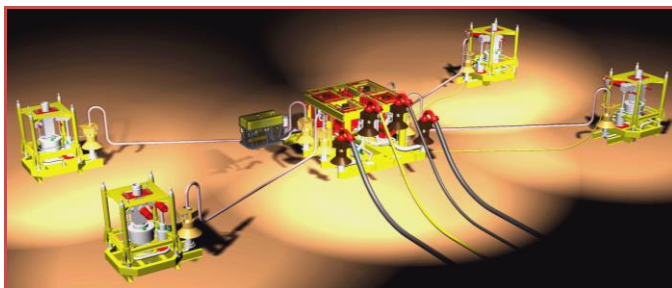

Bombora-ESP can integrate into our client's team assisting in the management of sub-consultants, suppliers, contractors or subcontractors ensuring that the project scope is completed to budget and schedule without compromise to the important aspects of quality, safety and the environment.

### Independently:

Bombora-ESP can complete specialist scopes outside of the project team and, using the combined skills and experience of our team, execute small packages of work independently.

### With specialist support:

Bombora-ESP is able to draw on the support of a number specialist consultants and companies to offer supplementary services, strengthen core services and offer our clients high-calibre multi-disciplined review teams.

## Skill Set

Bombora-ESP's skill set is predominantly in the following areas:

- Pipeline and subsea engineering;
- Installation and construction engineering.

In addition Bombora-ESP is able to draw on the expertise of strategic partners to enhance our service and provide additional capabilities, including:

- materials;
- technical safety;
- geotechnical engineering;
- subsea systems and controls;
- process and flow assurance; and
- onshore pipelines.

Bombora-ESP's team consists of personnel who:

- are highly qualified and experienced;
- are committed to delivering work that meets or exceeds client's expectations; and
- command specialised skills which are in demand and supplement our skill-set.

## Key Differentiators

There are subtle, important, differences that set Bombora-ESP apart from its competitors:

### Flexibility

We understand that our clients have unique project requirements, are structured differently and vary in levels of in-house capability. Bombora-ESP is able to scale our approach to meet individual client's needs.

Bombora-ESP can supply short term personnel to satisfy clients who have a short term resource requirement or a specific technical issue.

### Value Improvement

Bombora-ESP aims to add value to the projects we work on by merging ingenuity with experience to provide the optimum outcome for our clients.

### Expertise

Bombora-ESP's team consists of industry specialists who have held integral roles in oil and gas projects in all major operating regions of the world. Through these projects our team has been exposed to:

- some of the world's most challenging projects (in terms of size, complexity and technicality);
- the full project lifecycle (from feasibility through to decommissioning and removal);
- various positions in various companies (design consultants, contractors and operators); and
- a variety of international design codes and standards.

### Commitment to HSEQ

Health and Safety, Environment and Quality are integral to the way Bombora-ESP does business. Bombora-ESP has implemented:

- a Quality Management System that has been certified against the requirements of ISO 9001; and
- a HSE Management System that complies with the requirements of ISO 4801 and ISO 14001.

### Independence

Bombora-ESP is a privately owned company that operates with integrity and innovation to ensure our client's needs are met professionally and promptly.

### Industry Best Practices

By working with multiple clients (i.e. owners/operators, consultancies, installation and construction contractors) Bombora-ESP is able to implement industry best practices for our clients.

### Commitment to our values

Bombora-ESP is dedicated to upholding company values.
